

America's Freight Rail System Is Tied In Knots.

Unrestrained monopoly power has resulted in record profits for the rail industry while rail customers are left with **high prices, poor service, and no competitive alternatives**. Manufacturers, farmers, electric utilities and their customers are being railroaded — discovering that reliable freight rail service is not available at any price.

Rail customers urge Congress to enact laws that will ensure freight rail competition and protect rail customers, American jobs and consumers.

Restore competition. Stop exporting jobs. Untie America's rail lines.
